Read the Syllabus

□ - [] Course Syllabus: *Segnali Elettrofisiologici* Master's Degree in Bioengineering | UNIMORE

- Academic Year: 2026/27
- Course code: BIOING_20
- Course info: year 2, winter semester, 6 credits
- Lecturer: Prof. Eng. Michele GIUGLIANO, PhD
- Format: In-person lectures
- Attendance: At least 80%

Syllabus: It is an outline of the topics taught in the course. It also contains additional information, designed to 1) preemptively answer students' questions, 2) list policy and mutual expectations and 3) the consequences of failing to meet them. It does not replace the official information about the course, published online at <https://unimore.coursecatalogue.cineca.it>, but extends it.

Table of Content

- 1. Learning Objectives
- 2. Prerequisite Knowledge
- 3. Core Class Content
- 4. Study Materials & Resources
- 5. Grading Procedures & Important Dates
- 6. Course Logistics & Policies
- 7. Teaching Style & Language Policy
- 8. Contact and Communications

1. Learning Objectives

Students will be exposed to a selection of key topics in bioengineering, bringing them into direct contact with industrial, business, and academic environments. Upon completion of the course, students should have developed advanced knowledge and analytical skills in applying biomedical engineering principles to the development of innovative medical solutions. The course aims to develop the ability to critically evaluate and apply cutting-edge methodologies in the design and optimization of medical technologies, preparing future bioengineers to address complex challenges in the field of innovative and translational medicine.

2. Prerequisite knowledge

Curricular requirements declared: By enrolling in this Master's Degree program, students have formally declared they satisfied the UNIMORE curricular requirements.

- organization
- study material
- objectives
- exam, etc.

Exam sessions: 6/year

- Jan 2027, 12th *primo appello invernale*
- Feb 2027, 9th *secondo appello invernale*
- Jun 2027, 8th *primo appello estivo*
- Jul 2027, 15th *secondo appello estivo*
- Sep 2027, 9th *primo appello autunnale*
- Sep 2027, 23rd *secondo appello autunnale*

Students can register starting **from 15 days before and up until 3 days before** the scheduled exam date.

Students who register and **do not show up, must skip one session** (i.e., they are not allowed to register to the very next exam session).

Class organization

- **8:30 - 9:00:** Warm up and **soft-skills**.
- **9:00 - 9:05:** Introduction. I will introduce the Guest, expertise, and work to the students.
- **9:05 - 10:15:** **Formal Talk** on current research, entrepreneurial activity, a specific project, or primary area of expertise of our Guests.
- **10:15 - 10:30:** Q&A. Students **must** prepare upfront 2 relevant questions, directly related to each guest. **Take it as a challenge.**
- **10:30 - 10:45:** Short Break. Coffee and oxygen.
- **10:45 - 11:10:** **Career Trajectory Discussion** (~30 min) on Guest's personal journey: key decisions, challenges, and milestones that shaped their career.
- **11:10 - 12:35:** **Interactive Hands-on Session**, break into small **groups** (8-10 people/group) to work/brainstorm collaboratively on a practical problem or case study related to your talk.
- **12:35 - 1:30:** **Group Presentations** & Wrap-up. Each group gives a brief presentation.
